## Welcome Work

Who are we?

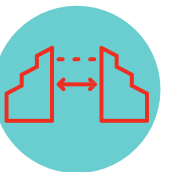

### European Funded

Welcome Works is a European Funded Project that aims to face the ongoing refugee crisis through integration into the workforce.

### Inclusive Work

This project has a vision of creating inclusive and supportive work environments within the construction sector for those who have been displaced.

### Bridging Gaps

Welcome Works hopes to bridge the gap between significant construction labor shortage and refugees seeking employment.

### Resources & Training

Welcome Works has been designed to provide tailored resources and training that help refugees find their footing in a new country, especially in employment.

# Launching our Mobile App

## What is the Training App?

The Mobile Training App is designed to assist refugees and newcomers entering the construction sector. It offers clear guidance, short learning resources, and a chat assistant for easy understanding. The app addresses real-life challenges such as navigating systems, overcoming language barriers, and validating experience, providing a mobile-first experience for learning anytime, anywhere.

01

## Who is the app for?

The app is designed for newcomers to construction or those new to the country, offering support for individuals with limited language skills or low digital confidence. It covers essential topics like work rights, job roles, skills recognition, CV preparation, training opportunities, and workplace expectations. Visual aids such as a phrasebook, construction glossary, and checklists simplify the information.

02

## What is in the app?

The app features a chat-based assistant that addresses everyday queries related to work, training, and adapting to new environments. Users can communicate naturally, and the assistant offers practical explanations and links to helpful resources. While not providing legal advice, it clarifies options and next steps in a supportive manner.

03

## Extra Resources

The app serves as a helpful resource for educators, support workers, and community organizations assisting newcomers in the construction sector. Its user-friendly design, dependable information, and adaptable learning tools facilitate integration into workshops, one-on-one support, or independent study.
